

## AE1300H Features/Benefits/Accessories

<b>VAD</b>	-5 mph	2 mph	4 mph
	48 holes/ft	12 holes/ft	8 holes/ft
	Patch & Seed	High Hole Density	Top Speed Aeration

**Variable Aeration Density** creates 2-10X more holes than drum models in one pass! Eliminates double aerating and offers ability to do patch repair and seed bed prep in one pass.

**"In-ground" steering** for unmatched maneuverability, ergonomics, ease of turning, improved production, reduced downtime and turf repair when compared to drum aerators. Plus, **reverse aeration** adds even more productivity!

**Independently acting, "FLEXTech" arms** are durable and forgiving for unmatched reliability! Reciprocating action drives plug depths up to 2x that of drums. Significantly reduces call backs and/or rework regardless of soil conditions. Patent Pending.

**Self-propelled, variable speed**, intuitive hydro-drive controls allow you to feather the speed and operate in both forward and reverse with finger tip control. Reduces fatigue and vibration. Takes the chore out of the chore!

**Slopes up to 20 degrees** This unit has 15" tires and a 35" wheel base to accommodate slopes up to 20-degrees. Optional foam filled tires can improve results further. (Part No. 362601)

**30" wide aerating productivity** is combined with outstanding durability, speed, deep plug depth and no need to double aerate! This machine fits everywhere you need to go. No need for both large and small machines.

**Ride on Chariot** for larger open area operation such as sports fields and large commercial runs. (Part No. 362600)

**Optional solid steel spikes** are excellent for improving drainage or for other no-clogging applications. Sold individually. (Part No. 360394)

### AE1300H (Honda)

This machine combines true 30" wide aeration and speed up to 4.3 mph to complete 1/4 acre in as little as 15 minutes! 59% faster than a 26" drum. Variable aeration density (VAD) from 8 to 48 holes per square ft. in one pass compared to an avg. fixed hole pattern of 6 on drums and variable hydro drive for aeration in both forward and reverse.

Honda power, Hydro-Gear drive & pump, Eaton Motor, Flextech™ arms, and only two #5D chains combine for the ultimate in commercial reliability. Reciprocating action drives plugs up to 2x the depth of drums, especially in drier conditions. Soil condition or type is a non-issue. Aerate wet or dry, saving time and maximizing profitability.

**ONE MACHINE does the same work as a 19" and 26" drum working at the same time with only ONE OPERATOR. Up to 2x as many plugs in ONE PASS. Eliminate shallow plugs, damaged turf and call backs. Aerate ONE TIME with Billy Goat.**
